

► The **Senator II** Chevy Chassis

► At StarTrans Bus, we focus on safety, from the 3,000 lbs. seat-pull test to the rigorous 7-year/200,000 mile Altoona testing, the Senator II, built on a Chevy chassis, surpasses the most stringent testing. With its fully welded steel cage construction, the Senator II provides maximum passenger protection.

Passenger convenience and comfort are built into every StarTrans bus. The Senator II is built with wide aisles and doors for easy accessibility, spacious luggage racks, large windows and straight side wall construction to maximize passenger shoulder space.

Versatility remains a vital part in the Senator II's design. Engineered to accommodate a variety of seating arrangements, including wheelchair accessibility and various storage configurations for luggage, the Senator II gives you and your passengers the options you need.

Finally, we back our buses with a 5-year/75,000 mile body structural warranty, making the Senator II the obvious choice when it comes to a medium-duty transit bus.

► **Senator II Features** | **Features to Meet Your Specific Needs**

Optional high-back seats, upholstery, padded cloth walls and ceiling, and overhead luggage racks

Driver's switch panel conveniently located within view of the road and not on the engine cover
