E-SERIES BUSES

The Embassy® Bus E-Series is built on the Ford E350 and E450 Medium Duty Chassis. Our forward thinking technology and well-crafted interior allows for a quiet and comfortable ride. This vehicle is designed to accommodate the physically challenged or as an all passenger unit. Our buses are designed to provide a safe and enjoyable environment for years to come. Allow us the opportunity to demonstrate why Embassy vehicles are in a class of their own.

1 VACUUM INFUSED FIBERGLASS

Computer controlled processes create uniform thickness with 50% greater glass content. The result is much thinner and lighter, yet stronger, than traditional fiberglass.

2 COMPOSITE FLOOR & SIDEWALLS

Structurally reinforced fiberglass composite material greatly reduces vehicle weight and is moisture resistant for a lifetime of service.

3 PATENT-PENDING ROOF SYSTEM

Our one piece, extruded roof system channels water away from sidewall seams and gives greater structural integrity.

4 FLOOR PLANS

All Embassy E-Series models are offered in our three standard floor plans: All Passenger, Passenger With Luggage and Passenger Lift Equipped. And of course, Embassy buses can always be custom configured to meet your specific needs.

5 6 BUILT TO LAST

Embassy buses are efficiently built using the same modern processes as the most rugged delivery trucks and today's finest automobiles. Embassy quality lasts for years to come. Passengers will appreciate our attention to detail and comfort in the cabin as well.
